Since its launch in 2014, AIE CHINA has evolved in step with the development of China's aircraft interiors industry, marking more than a decade of industry engagement and growth. Over the years, the exhibition has brought together thousands of companies from nearly 40 countries and regions, with a cumulative exhibition area of more than 50,000 square meters. With international exhibitors representing 42% of the total, AIE CHINA has established as a major industry event in Asia for aircraft interiors and cabin refurbishment, serving as a professional platform for sourcing, business matchmaking and industry collaboration. In 2027, AIE CHINA will mark its milestone 10th edition. On the basis of a decade of industry expertise and resources, the exhibition will evolve from a sourcing platform into an industry ecosystem, from product showcase to standards and trend leadership, and from a gateway to China into an industry hub for Asia. Currently, the global aircraft interiors refurbishment and MRO market is experiencing steady growth. According to industry estimates, the market was valued at approximately RMB 14.18 billion in 2024 and is projected to reach RMB 18.56 billion by 2031. Meanwhile, the broader aircraft cabin interiors market reached USD 27.5 billion in 2025 and is expected to grow to USD 41.5 billion by 2035. China's commercial aircraft fleet is expected to grow at an annual rate of over 4%, driving sustained demand for cabin inspection and refurbishment. As China raises airworthiness and compliance standards for cabin interiors and its commercial aircraft industry continues to mature, domestic suppliers are moving beyond basic manufacturing capabilities toward higher levels of quality, performance and certification, creating significant opportunities across the aircraft interiors and refurbishment market.
